

# GRAVEL-PACK BLENDER SKID

## HIGHLIGHTED FEATURES

1

2

- Portable Batch and Continuous mixing Unit designed for Gravel Pack Slurry preparation
- Two Skid Mixer, Control System & Engine Pack for Off-Shore tight Rig Space
- Lifting Frame for easy transporting and hoisting (Crash Protection Frame)
- Two 5x6x14 Centrifugal Pumps for:
  - Transfer Fluid from Remote Source into Mixing Tank
  - Re-Circulation Fluid back to Same Tank (Continuous Recirculation)
  - Mixes & Transfer Fluids between Tanks
  - Deliver treatment fluid to Suction Head of a High Pressure Pump Unit (Triplex Pump)
- Stainless Steel Hard piping with Victaulic Connection for modular piping system
- Hydraulic Driven, Air Start (On broad Hydraulic and Pneumatic Power)
- Direct driven Hydraulic power unit by Caterpillar 325 HP Diesel Engine
- Two mixing/pressurizer Pumps with Nedox Coating (Hydraulic Driven)
- Variable flow control on Centrifugal Pump and Agitator Motor (Dual Rotation)
- Stainless Steel Agitator Axial and Radial Flow Impeller
- Venturi Mixing Hopper with Cutting Table
- Self Cleaning tanks Two Stainless Steel 35 BBL Blending Tanks with Bottom Washout
- Baffles for even mixing
- Stainless Steel Piping for Direct Dry Feed in the Mixing Tanks
- Each Tank got 1" Side out lets for sampling Material
- 4" Fig 1502 Weco Inlet Lines
- Custom design as per client requirements
